

# Input Text Visibility Fixed

---

**Commit:** 8f435ff - "fix: Make input text white for better visibility"

**Status:**  Pushed to GitHub `main` branch

**Deploy:**  Vercel auto-deploying (2-3 minutes)

---

## What Was Fixed

---

### Problem:

- Input text in the command box was invisible (black on dark background)
- Users had to highlight text to see what they were typing
- Poor UX

### Solution:

Changed input text color from green to white:

```
// BEFORE (Line 109)
className="... text-green-400 ..."

// AFTER
className="... text-white ..."
```

## Result

---

### Before:

- Type "Show git status" → can't see what you're typing
- Have to highlight to read

### After:

- Type "Show git status" → bright white text, perfectly visible
  - Can see every character as you type
- 

## Status

---

 **Code:** Fixed (1 line change)

 **Build:** Passed

 **GitHub:** Pushed (commit 8f435ff)

 **Vercel:** Auto-deploying now

 **ETA:** 2-3 minutes

---

## What You'll See

---

Once Vercel deploys:

1. Visit `/deep`
2. Look at input box at bottom
3. Start typing
4. **See bright white text** ✓
5. Much better visibility!

---

**Simple fix, big impact on UX!** 🚀
